Syosset to Oakwood Project

Appendix C

Public Outreach

APPENDIX C: PUBLIC OUTREACH

The Applicant either has undertaken or intends to complete the following public outreach and information efforts in support of this Article VII Application.

- A Project introductory virtual meeting between the Applicant and Staff of the Department of Public Service was held on January 31, 2025 and April 8, 2025.
- A Public Notice of the Application was published in Newsday on April 4, 2025 and April 11, 2025. A copy of the Public Notice is included in this Appendix as Attachment C-1.
- Copies of the Application are being provided to the following local libraries to be available for public inspection:
 - Huntington Public Library (Station Branch)
1335 New York Avenue
Huntington Station, New York 11746
 - Syosset Library
225 S Oyster Bay Road
Syosset, New York 11791
- Local government officials in the municipalities traversed by the Project and the alternative routes have been contacted personally by PSEG Long Island Staff. PSEG Long Island representatives met with officials from the Town of Huntington (March 19, 2025, and April 7, 2025), the Town of Oyster Bay (March 24, 2025, and April 15, 2025), Nassau County (April 8, 2025) and Suffolk County (April 14, 2025) to notify them of the Project and planned Article VII filing.
- Government officials, identified in this Appendix as Attachment C-2 were sent, by first class mail on April 15, 2025, a letter with an included Project Fact Sheet notifying them of the Project. The Fact Sheet is included in this Appendix, in both English and Spanish, as Attachment C-3 and a form of the letter sent to government officials is included in this Appendix as Attachment C-4.
- A local telephone number has been established for people seeking additional information about the Project: 631-792-6866. The number receives both audio and text messages.
- A Project website has been established to provide additional information to the public about the Project: www.Syosset2Oakwood.com. A contact form has been set up on the website along with an email address: info@Syosset2Oakwood.com.

- Abutting residents along the proposed Project route and all alternative routes included in this Appendix as Attachment C-5 were sent, by first class mail on April 15, 2025 a letter notifying them of the Project with an included Project Fact Sheet in English and Spanish. A copy of that letter, “Abutter Letter” is included in this Appendix as Attachment C-6.
- The Syosset Fire Department, Cold Spring Harbor Fire Department, Huntington Fire Department, Huntington Manor Fire Department, and Huntington Community First Aid Squad were sent by first class mail on April 15, 2025, a copy of the “Abutter Letter” with an included Project Fact Sheet.
- The Project identified parties of interest along the Project route or the alternative routes that were sent, by first class mail on April 15, 2025 a copy of the “Abutter Letter” with an included Project Fact Sheet. The interested parties included local school districts Huntington Union Free School District, South Huntington Union Free School District, and Syosset Central School District; water authorities South Huntington Water District, Suffolk County Water Authority, and Jericho Water District; local places of worship Chinmaya Mission, and St. Mark Coptic Church Center; and additional parties of interest including Cold Spring Harbor Country Club, Kerber’s Farm, and the Long Island Farm Bureau.
- There are two crossings of the Port Jefferson Branch of the Long Island Rail Road. The first crossing is at Woodbury Road in the Town of Oyster Bay, Nassau County; the second crossing is at West 11th Street in the Town of Huntington, Suffolk County. The Long Island Rail Road was identified as an interested party and added to the Project Service List. Permits will be pursued for both crossings.
- The Project identified a disadvantaged community (“DAC”) within the project scope including housing from the LI Housing Project LLC and Center for Development Disabilities. A DAC with limited English proficiency was identified within the Project study area. The most prevalent language spoken was Spanish as such, the Project Fact Sheet was translated into Spanish. The Project website is enabled to be translated into any language through Google Translate.
- Each landowner of property on which any portion of the Project is proposed to be located, a list of which is included in this Appendix as Attachment C-7, was served by first class mail on April 15, 2025 with a notice that such landowner’s property may be impacted by the Project. The notice included a description of the Project and an explanation of how to file with the Commission a notice of intent to be a party to the Article VII proceeding and the timeframe for filing the Application. A copy of that notice is included in this Appendix as Attachment C-8.

- A “Project Field Card”, included in this Appendix as Attachment C-9, was developed and will be given to contractors of the project conducting field surveys if members of the public approach with questions about the project.

PUBLIC NOTICE

APPLICATION OF PSEG LONG ISLAND ON BEHALF OF AND AS AGENT FOR THE LONG ISLAND LIGHTING COMPANY D/B/A/ LIPA FOR A CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY AND PUBLIC NEED PURSUANT TO ARTICLE VII OF THE PUBLIC SERVICE LAW

TO WHOM IT MAY CONCERN

PLEASE TAKE NOTICE that PSEG Long Island LLC on behalf of and as agent for the Long Island Lighting Company d/b/a LIPA (“LIPA” or the “Applicant”) intends to file an application (“Application”) with the New York State Public Service Commission (“Commission”) pursuant to Article VII of the Public Service Law (“PSL”) of the State of New York for a Certificate of Environmental Compatibility and Public Need (“Certificate”) for the construction, operation and maintenance of the Syosset to Oakwood Project (“Project”). Before constructing the Project, the Applicant must receive a Certificate from the Commission.

DATE OF FILING

The Applicant expects to file the Application with the Commission on or about April 15, 2025.

PROJECT DESCRIPTION

As proposed, the Project would include: the installation of a new approximately 2.8 mile underground electric transmission line primarily within the public rights-of-way between Woodbury Tap in the Town of Oyster Bay, Nassau County, and Oakwood Substation in the Town of Huntington, Suffolk County; the expansion of Oakwood Substation, including the installation of new facilities on LIPA property to the north of the current facility; the installation of new riser poles at Woodbury Tap on LIPA property south of the Long Island Rail Road tracks; and, to tie the new line to the new riser poles, the installation of new overhead transmission poles. Modifications also would be made to existing lines 138-675 and 138-676, which both run from Woodbury Tap to Oakwood Substation.

A combination of different construction methods would be used to install the underground conduits and overhead lines. The Project would generally use open-cut trench excavation methods, and a trenchless crossing method is anticipated for the at-grade crossing of the Long Island Rail Road into Oakwood Substation. Underground splice vaults, which serve to install and connect successive lengths of cable, would be installed at approximate intervals of 2,000 to 2,500 feet.

The Application will provide details about the need for the Project, descriptions of the potential environmental impacts of the Project, and a summary of the various reasonable alternatives the Applicant considered to address the need for the Project.

During the course of the proceedings, alternative routes not included in the Application or affected by the Applicant’s proposed route may be offered without further notice by

publication. In addition, the Commission may, without further notice by publication, approve a route for the Project that traverses municipalities not presently affected by the proposed route.

LOCATION OF PROJECT

The proposed route of the Project starts aboveground at Woodbury Tap in the Town of Oyster Bay, Nassau County; traverses underground for approximately 2.8 miles along public roads as well as railroad and private property; and ends aboveground at Oakwood Substation in the Town of Huntington, Suffolk County.

The locations of the Project's facilities will be depicted in the Application and associated figures.

AVAILABILITY OF APPLICATION

A copy of the Syosset to Oakwood Project Application will be served upon the chief executive officers of Nassau and Suffolk Counties and the Towns of Oyster Bay and Huntington and a copy will be available for public inspection in each of the following locations: Syosset Library, 225 S. Oyster Bay Road, Syosset, NY 11791; and Huntington Public Library, Station Branch, 1335 New York Avenue, Huntington Station, NY 11746.

In addition, a copy of the Application will be available for public inspection at the Department of Public Service Offices in Albany (Office of Central Files, 14th Floor, Three Empire State Plaza, Albany, NY 12223) and will be posted on the Commission's website (www.dps.ny.gov).

ADDITIONAL ASSISTANCE

For information or assistance concerning the Application, interested persons may contact the following:

Syosset to Oakwood Project

PSEG Long Island is committed to delivering best-in-class system reliability by expanding electrical capacity to meet the energy needs of the communities it serves, today and in the future.

Project Overview & Benefits

PSEG Long Island, as the agent of LIPA, is proposing the Syosset to Oakwood Project, to meet current and future capacity needs, and to maintain safe, reliable, and robust service in the area. The Project would include the installation of a new approximately 2.8-mile 138kV underground electric transmission line between the Woodbury Tap in Woodbury, Nassau County, to the Oakwood Substation in Huntington Station, Suffolk County. The new 138kV underground transmission line is proposed to occur primarily within the public rights-of-way along Woodbury Road, West Pulaski Road, Oakwood Road, and West 11th Street.

The Syosset to Oakwood Project includes the installation of new riser poles and overhead transmission poles at the Woodbury Tap. This Project also includes upgrades to the Oakwood Substation and the installation of new overhead equipment. Modifications will also be made to existing lines 138-675 and 138-676, which both run from the Woodbury Tap to the Oakwood Substation.

Benefits Include:

- The new 138kV electric transmission cable will help ensure continued reliable service. The proposed 138kV supply circuit from the Woodbury Tap to the Oakwood Substation will enhance reliability and increase load capacity to the existing transmission system.
- The Project will be located primarily under roads and other public rights-of-way.
- The new 138kV cable will be located underground except for certain above-ground electrical equipment and structures at the Woodbury Tap and Oakwood Substation.

Project Area:

New York State Public Service

Commission Article VII Information

After the Project's amendment application is filed and the Commission assigns a case number to the Project, the case number will be provided on the Project's website. Then, the amendment application and related case documents can be accessed on the PSC website (www.dps.ny.gov) by clicking "File Search" and filling in the case number. This will bring up the main Document and Matter Management ("DMM") page(s) for this case, where the materials are located.

In addition, interested persons who wish to participate as parties in this case may file for party status. On the DMM page for this case, the prospective party should click the button at the upper right labeled "Request for Party Status" to see a Public Service Commission web page with instructions for the procedures to follow to become a party.

For Questions About the Syosset to Oakwood Project,

Visit www.Syosset2Oakwood.com

Syosset to Oakwood Project

Underground Transmission Construction Process

- **Splice Vaults Installation:**
Underground vaults will be installed at intervals along the route to splice together underground cable.
- **Conduit Installation:**
During the installation process, crews will route the new conduits to the new splice vaults.
- **Restoration:**
After completing the installation of the vaults, any excavated and disturbed areas will be restored.
- **Cable Installation:**
Underground cable arrives on trucks specifically designed for their installation. Crews will pull cable from one vault to another along the project route.
- **Cable Splicing:**
Crews will set up a climate-controlled environment at each vault location to splice the underground cables together. This activity is continuous for approximately one week for each vault.

Vault Installation

Conduit Installation

Cable Splicing

Cable Installation

Overhead Transmission Construction Process

Overhead transmission and riser structures will be installed at the Woodbury Tap and overhead structures will be installed at the Oakwood Substation. The new structures will be within LIPA property and will connect the new underground transmission line to existing structures.

Permitting & Consultation Process

To construct the Project, PSEG Long Island will need, in addition to other necessary permits:

- The New York State Public Service Commission's issuance of an Article VII Certificate of Environmental Compatibility and Public Need and approval of an Environmental Management & Construction Plan (EM&CP).
- Approval from or consultation with the New York Department of Environmental Conservation, and New York State Office of Parks, Recreation & Historic Preservation.
- Consultation with Nassau County, Suffolk County, Town of Oyster Bay, and Town of Huntington.

Proyecto de Syosset a Oakwood

PSEG Long Island se compromete a brindar la mejor confiabilidad del sistema en su clase al ampliar la capacidad eléctrica para satisfacer las necesidades energéticas de las comunidades a las que sirve, hoy y en el futuro.

Descripción general y beneficios del proyecto

PSEG Long Island, como agente de LIPA, propone el Proyecto Syosset a Oakwood para satisfacer las necesidades de capacidad actuales y futuras, y mantener un servicio seguro, confiable y robusto en la zona. El proyecto incluiría la instalación de una nueva línea de transmisión eléctrica subterránea de 138 kV de aproximadamente 2.8 millas entre Woodbury Tap en Woodbury, condado de Nassau, hasta la subestación Oakwood en Huntington Station, condado de Suffolk. Se propone que la nueva línea de transmisión subterránea de 138 kV se ubique principalmente dentro de las servidumbres de paso públicas a lo largo de Woodbury Road, West Pulaski Road, Oakwood Road y West 11th Street.

El Proyecto Syosset a Oakwood incluye la instalación de nuevos postes de transmisión y de elevación en Woodbury Tap. Este proyecto también incluye mejoras en la subestación Oakwood y la instalación de nuevos equipos de transmisión. También se modificarán las líneas existentes 138-675 y 138-676, que van desde Woodbury Tap hasta la subestación Oakwood.

Los beneficios incluyen:

- El nuevo cable de transmisión eléctrica de 138 kV contribuirá a garantizar un servicio continuo y confiable. El circuito de suministro de 138 kV propuesto, desde Woodbury Tap hasta la subestación Oakwood, mejorará la confiabilidad y aumentará la capacidad de carga del sistema de transmisión existente.
- El Proyecto se ubicará principalmente debajo de carreteras y otros derechos de paso públicos.
- El nuevo cable de 138 kV estará ubicado bajo tierra, a excepción de ciertos equipos y estructuras eléctricas sobre el suelo en Woodbury Tap y la subestación Oakwood.

Área del proyecto:

Información del Artículo VII de la Comisión de Servicio Público del Estado de Nueva York

La solicitud del Proyecto, conforme al Artículo VII de la Ley de Servicio Público, y los documentos relacionados con este caso (Caso XX-X-XXXX) se pueden consultar en el sitio web de la PSC (www.dps.ny.gov). Haga clic en "Archivo de la Comisión", luego en "Búsqueda de archivos" y complete la casilla "Buscar por número de caso" con el número de este caso (XX-X-XXXX). Esto abrirá la(s) página(s) principal(es) de Gestión de Documentos y Asuntos ("GDA") de este caso, donde se encuentran los materiales.

Además, las personas interesadas que deseen participar como partes en este caso pueden solicitar la condición de parte. En la página de la DMM para este caso, la posible parte debe hacer clic en el botón "Solicitud de Condición de Parte" en la esquina superior derecha para acceder a la página web de la Comisión de Servicio Público con instrucciones sobre los procedimientos a seguir para ser parte.

Proyecto de Syosset a Oakwood

Proceso de construcción de transmisión subterránea

- **Instalación de bóvedas de empalme:**

A lo largo de la ruta se instalarán bóvedas subterráneas a intervalos para unir los cables subterráneos.

- **Instalación de conductos:**

Durante el proceso de instalación, los equipos dirigirán los nuevos conductos hasta las nuevas bóvedas de empalme.

- **Restauración:**

Una vez finalizada la instalación de las bóvedas, se restaurarán las áreas excavadas o perturbadas.

- **Instalación de cables:**

El cable subterráneo llega en camiones diseñados específicamente para su instalación. Las cuadrillas lo tenderán de una bóveda a otra a lo largo de la ruta del proyecto.

- **Empalme de cables:**

Los equipos instalarán un ambiente climatizado en cada bóveda para empalmar los cables subterráneos. Esta actividad se realiza de forma continua durante aproximadamente una semana en cada bóveda.

Instalación de la bóveda

Instalación de conductos

Empalme de cables

Instalación de cables

Proceso de construcción de transmisión aérea

Se instalarán estructuras aéreas de transmisión y de tuberías verticales en Woodbury Tap y estructuras aéreas en la subestación Oakwood. Las nuevas estructuras se ubicarán dentro de la propiedad de LIPA y conectarán la nueva línea de transmisión subterránea con las estructuras existentes.

Proceso de permisos y consulta

Para construir el Proyecto, PSEG Long Island necesitará, además de otros permisos necesarios:

- Emisión por parte de la Comisión de Servicio Público del Estado de Nueva York de un Certificado de Compatibilidad Ambiental y Necesidad Pública del Artículo VII y aprobación de un Plan de Gestión Ambiental y Construcción (EM&CP).
- Aprobación o consulta con el Departamento de Conservación Ambiental de Nueva York y la Oficina de Parques, Recreación y Preservación Histórica del Estado de Nueva York.
- Consulta con el condado de Nassau, el condado de Suffolk, el pueblo de Oyster Bay y el pueblo de Huntington.

Attachment C-4 Elected Official Letter

15 Park Drive
Melville, NY 11747

April 15, 2025

Re: Introduction to the proposed "Syosset to Oakwood Project"

Dear Senator Mattera:

PSEG Long Island LLC ("PSEG Long Island"), on behalf of and as agent for the Long Island Power Authority d/b/a LIPA, has identified an electrical need in your area which will be addressed by the proposed Syosset to Oakwood Project (the "Project").

To facilitate this project, PSEG Long Island will be filing an application for an Article VII Certificate for the construction, operation and maintenance of the Syosset to Oakwood Project. The Project would include the installation of an approximately 2.8 mile underground electric transmission line primarily within the public rights-of-way between the Woodbury Tap in Woodbury and Oakwood Substation in Huntington Station; the expansion of the Oakwood Substation, including the installation of new facilities on LIPA-owned property to the north of the current facility; the installation of new riser poles at Woodbury Tap on LIPA property south of the Long Island Rail Road tracks; and, to tie the new line to the new riser poles, the installation of new overhead transmission poles. Modifications also would be made to existing Transmission Lines 138-675 and 138-676, which both run from Woodbury Tap to Oakwood Substation.

The Syosset to Oakwood Project is needed to meet the current and future capacity needs of customers and to continue to provide safe, robust, and reliable service in the area. The project is proposed to start construction in spring 2028 and be in service by 2030 for PSEG Long Island to meet the identified needs.

Enclosed with this letter you will find a fact sheet that offers an overview of the Syosset to Oakwood Project. The project website, www.Syosset2Oakwood.com, will be kept up to date with project information throughout the duration of the project. If you or your constituents have any questions or concerns, please feel free to contact us via email at info@Syosset2Oakwood.com or call or text the project hotline at 631-792-6866.

Thank you.

Sincerely,

Mike Iannelli

Re: Introduction to the Proposed Syosset to Oakwood Project

Dear Neighbor:

PSEG Long Island LLC (or PSEG Long Island), on behalf of and as agent for the Long Island Power Authority d/b/a LIPA, has identified an important electrical need in your area, which will be addressed through the proposed Syosset to Oakwood Project (the "Project"). The Project is intended to increase the load capacity and reliability of the electric transmission system in the area and on Long Island.

Electric transmission lines play a crucial role in our power grid by carrying power from generation sources to the substations that serve residences and businesses in our communities with lower-voltage electricity. To reinforce LIPA's electric transmission system in your area, this Project will alter the existing transmission lines at the Woodbury Tap, add a new 138kV underground electric transmission line, and upgrade the existing Oakwood Substation.

The Syosset to Oakwood Project is needed to meet current and future capacity needs and to maintain a safe, reliable, and robust transmission system. The Project is proposed to start construction in spring 2028 and be in service by 2030 for PSEG Long Island to meet the identified need.

Transmission lines can be installed on overhead towers or underground. After studying the area, we have determined that underground transmission lines would be more appropriate for the Syosset to Oakwood Project. This is partly due to engineering design limitations present in the area, and partly due to our goals of minimizing impact to the environment and avoiding the creation of new rights-of-way for power infrastructure. To the maximum extent possible, the transmission line for the Syosset to Oakwood Project will be constructed within public streets and along existing municipal rights-of-way. The Project also includes the installation of riser poles and overhead transmission poles at the LIPA-owned Woodbury Road site, as well as upgrades and new overhead structures at the Oakwood Substation. Construction will be performed with the intent of minimizing impact to residents and travelers in the area to the extent practicable. Throughout construction, access to businesses and residences along the Project route will be maintained.

As part of the permitting process for the Syosset to Oakwood Project, PSEG Long Island is consulting with Nassau County, Suffolk County, the Town of Oyster Bay, the Town of Huntington, and will be filing for State approval in the form of a "Certificate of Environmental Compatibility and Public Need" from the New York State Public Service Commission. PSEG Long Island is also consulting with the New York Department of Environmental Conservation, New York State Office of Parks, Recreation & Historic Preservation and the New York State Department of Transportation.

We want you to understand the nature of this project and its importance to your community. Along with this letter, we have included a fact sheet about the Syosset to Oakwood Project which provides ways to communicate with us directly if you have further questions. For more information visit the Syosset to Oakwood Project website (www.Syosset2Oakwood.com), or contact the project directly through email (info@Syosset2Oakwood.com) or call or text the project hotline (631-792-6866).

Thank you for your time.

Sincerely,

Mike Iannelli
Syosset to Oakwood Project
PSEG Long Island

Attachment C-8 Statutory Landowner Notification

NOTICE PURSUANT TO PSL §122(2)(c)

April 15, 2025

BY FIRST CLASS MAIL

TO ALL LANDOWNERS OF LAND ON WHICH ANY PORTION OF THE FACILITY DESCRIBED BELOW IS TO BE LOCATED:

PSEG Long Island LLC, on behalf of and as agent for the Long Island Lighting Company d/b/a LIPA ("LIPA"), a wholly-owned subsidiary of the Long Island Power Authority (the "Applicant") intends to file on or about April 15, 2025, an application with the New York State Public Service Commission ("Commission" or "PSC") for a Certificate of Environmental Compatibility and Public Need under Public Service Law ("PSL") Article VII for the construction, operation and maintenance of the Syosset to Oakwood Project (the "Project") in Nassau County and Suffolk County, New York.

As proposed, the Project would include: the installation of a new approximately 2.8 mile underground electric transmission line primarily within the public rights-of-way between Woodbury Tap in the Town of Oyster Bay, Nassau County, and Oakwood Substation in the Town of Huntington, Suffolk County; the expansion of Oakwood Substation, including the installation of new facilities on LIPA-owned property to the north of the current facility; the installation of new riser poles at Woodbury Tap on LIPA-owned property south of the Long Island Rail Road tracks; and, to tie the new line to the new riser poles, the installation of new overhead transmission poles. Modifications also would be made to existing Lines 138-675 and 138-676, which both run from Woodbury Tap to Oakwood Substation.

A combination of different construction methods would be used to install the underground conduits and overhead lines. The Project would generally use open-cut trench excavation methods, and a trenchless crossing method is anticipated for the at-grade crossing of the Long Island Rail Road into Oakwood Substation. Underground splice vaults, which serve to install and connect successive lengths of cable, would be installed at approximate intervals of 2,000 to 2,500 feet.

The Application will provide details about the need for the Project, descriptions of the potential environmental impacts of the Project, and a summary of the various reasonable alternatives the Applicant considered to address the need for the Project.

During the course of the proceedings, alternative routes not included in the Application or affected by the Applicant's proposed route may be offered without further notice by publication. In addition, the Commission may, without further notice by publication, approve a route for the Project that traverses municipalities not presently affected by the proposed route.

Additional information about the Project is available from the Applicant by telephone (631-792-6866), email (info@Syosset2Oakwood.com), and at the Project's website (www.Syosset2Oakwood.com).

Your property may be impacted by the Project.

After the Application has been filed and the Commission has assigned it a case number, interested persons who wish to participate as parties in this case may file a request for party status in the case. This may be done through the Commission's web site. From the home page of the Commission's website (<https://dps.ny.gov>), a prospective party should click on "Commission Files" and then choose "File Search" in the drop-down menu. In the list under "Popular Searches" at the lower left side of the page, select

“Advanced Search for Commission Case Related Documents.” In the section labeled “Enter full Title or any portion of the text contained in Title” in the right column of the web page that appears, enter “Syosset to Oakwood.” and press “Search.” Then, in the “Search Result” that appears, click on the “Matter/ Case Number” on the left side. This will bring the user to the main Document and Matter Management (“DMM”) page for this case. On that page, the prospective party should click the button at the upper right labeled “Request for Party Status” to see a web page with instructions for the procedures to follow to request party status.

Ways to Comment to the Commission:

Via the Internet or Mail: Members of the public may submit comments by email to the Hon. Michelle L. Phillips, Secretary, at secretary@dps.ny.gov or by mail to Secretary Phillips at the New York State Public Service Commission, Three Empire State Plaza, Albany, New York 12223-1350. Comments may also be entered directly into the case file for this matter by clicking on the button labeled “Post Comments” at the upper right on the main DMM page for this case (see above).

Via the Commission’s Toll-Free Opinion Line: Individuals may choose to submit comments by calling the Commission’s Opinion Line at 1-800-335-2120. This line is set up to receive in-state calls 24 hours a day. These calls are not transcribed but a summary is provided to the Administrative Law Judge who will report to the Commission. All comments should refer to the case number.

All comments will become part of the record considered by the Commission. Comments will be accepted throughout the pendency of this case. Additionally, on the main DMM page for this case (see above), written comments can be viewed on the “Public Comments”, and the “Filed Documents” tab will contain other documents in the record, such as the application and transcripts of public statement hearings. A copy of the Application will be available for public inspection in each of the following local public libraries on or shortly after the date the Application is filed with the Commission: Huntington Public Library (Station Branch), 1335 New York Avenue, Huntington, NY 11746; and, Syosset Library, 225 S Oyster Bay Road, Syosset, NY 11791. In addition, copies of the Application will be available for public inspection at the Department of Public Service Offices in Albany (Office of Central Files, 14th Floor, Three Empire State Plaza, Albany, NY 12223). Many libraries offer free internet service, which can be used to obtain access to the Commission’s website, including the DMM.

Front

Syosset to Oakwood Project

PSEG Long Island is committed to delivering best-in-class electric service to you, our customers, by improving reliability and capacity of the electric transmission system.

Call or Text: 631-792-6866

Back

PSEG Long Island is planning to alter the transmission infrastructure at and adjacent to the Woodbury Tap in Woodbury, add a new 138kV underground transmission line, and upgrade the existing Oakwood Substation in Huntington Station. If you have questions about the project, contact us directly.
